INFRARED HEAT TECHNOLOGY

DEEP, EVEN WARMTH.

Aviation-grade carbon-nanofiber heating plates radiate a gentle infrared heat that warms the body directly — efficiently and evenly.

CARBON-NANOFIBER PLATES

Aviation-grade conventional mica heaters deliver a stable, comfortable infrared temperature.

EVEN RADIANT HEAT

Heat transfers to the body surface uniformly for effective, consistent, full-body comfort.

FAST WARM-UP

High heating efficiency reaches the set temperature quickly — into your session sooner.

LOW EMF DESIGN

Engineered for a low electromagnetic field, so you can relax with total peace of mind.

CRAFTSMANSHIP & CONSTRUCTION

BUILT FROM SOLID WOOD.

CANADIAN HEMLOCK / RED CEDAR

Solid, naturally fragrant timber with a warm grain and traditional, timeless character.

GLASS DOOR & FULL WINDOWS

Toughened glass door and floor-to-ceiling panels open up the space and add beauty.

FLAT-ROOF VENTILATION

The flat roof and ceiling vents promote air circulation for a fresh, comfortable session.

INSULATED CLOSED BACK

A solid timber rear wall and spliced side blocks retain heat and strengthen the build.

INTERIOR & COMFORT

SIT BACK & UNWIND.

SPACIOUS LIT INTERIOR

A roomy L-shaped bench lets you sit or recline in comfort, while neatly spaced wood-strip flooring keeps air moving and stays anti-slip underfoot. Built-in audio and soft ambient light set the mood every session.

L-SHAPED BENCH
